

## Learning Objectives

Course: Special needs in an inclusive learning environment

- ✓ To develop and put into practice the understanding of the theory and science behind students with special needs.
- ✓ To gain knowledge and a deeper understanding of the variety among students and how students with special needs function.
- ✓ To gain an understanding of different perspectives on all students.
- ✓ To gain an understanding of SOC Sense of Coherence and how to implement the theory in a school setting.
- ✓ To learn how to reach all students in an inclusive classroom through guiding and stimulation where varying methods are used.
- ✓ To learn the fundamentals of a few abilities which play an important role in learning in order to avoid that an undeveloped ability becomes a disability.
- ✓ To learn some helpful methods to develop a coaching approach for an enhanced communication with teachers, students and parents.
- ✓ To learn some key approaches to help developing students' wellbeing through breathing and mindfulness techniques.
