

Learning Outcomes

Course: Assessment for learning in innovative STEM

- ✓ Participants will be able to identify their students' starting points and how to move their learning forward successfully.
- ✓ Participants will have developed a classroom culture that encourages dialogue, enables them to identify and address students' misconceptions.
- ✓ Participants will have identified ways to adapt and improve teaching materials to make them more accessible.
- ✓ Participants will have developed a range of approaches to involve students in oral and written feedback to progress their learning.
- ✓ Participants will have acquired the knowledge on how to design progression and assessment approaches within practical work.
- ✓ Participants will have the tools for how to modify resources for a specific audience and activity, reflecting the diversity and context of the activity.
- ✓ Participants will be able to identify their students' starting points and how to plan to move their learning forward successfully and to demonstrate a range of approaches to elicit evidence of student understanding.
